NAVNIT BIHARI

biharinavnit28@gmail.com | +91 9097944359 | LinkedIn | GitHub | LeetCode | Portfolio

PROFILE SUMMARY

B.Tech Computer Science Engineering graduate (2026) with a strong foundation in **SQL/database concepts, Linux, Operating Systems, Computer Networks, DBMS, and Data Structures & Algorithms**, and hands-on experience building, debugging, and deploying database-driven applications with REST APIs using Java, JavaScript, Node.js, and MongoDB/MySQL. Solved 165+ LeetCode problems, with an analytical, root-cause-oriented approach to troubleshooting. Seeking an **Engineer – Software Support** role.

TECHNICAL SKILLS

Programming: Java, JavaScript; Data Structures & Algorithms (165+ LeetCode problems)
Databases & SQL: MySQL, MongoDB; SQL queries, joins, and data retrieval; DBMS concepts
Linux & Core CS: Linux (commands, OS fundamentals), Operating Systems, Computer Networks, DBMS, OOP
Backend & APIs: Node.js, Express.js, RESTful APIs, JWT authentication, API integration (Razorpay, OpenWeatherMap)
Deployment & Tools: Git, GitHub, Vercel, Render, VS Code; Git-based DevOps workflows
Frontend: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap

WORK EXPERIENCE

MERN Full Stack Developer Intern — EduSkills Academy *Jan 2026 – Mar 2026*

- Completed a 10-week industry internship covering core JavaScript, React, Node.js, and backend best practices across the full MERN stack.
- Developed RESTful APIs with Node.js and Express.js, integrated MongoDB via Mongoose for data persistence, and implemented JWT-based authentication and authorization.
- Worked through Git-based DevOps workflows for version control and deployment; diagnosed and fixed issues across the UI, API, and database layers.
- Delivered a capstone e-commerce platform (user management, product catalog) and a time series analytics project.
- Certificate ID: 2026-7FCEA34B48 — Issued Mar 09, 2026.

PROJECTS

Doctor Appointment Booking System (MERN Stack) — GitHub | Live

- Built a full-stack healthcare platform with Patient, Doctor, and Admin dashboards using MongoDB, Express.js, React.js, and Node.js.
- Implemented JWT authentication, role-based access control (RBAC), specialty-based doctor search, and real-time appointment status management across three user roles.
- Designed and documented 9 RESTful API endpoints and integrated the Razorpay payment gateway for secure, end-to-end booking transactions.
- Deployed to production and optimized performance: Lighthouse scores of 75 (Performance), 88 (Accessibility), 83 (SEO), zero Cumulative Layout Shift, 2.7s Speed Index.

AI Virtual Assistant (JavaScript, Web APIs) — GitHub

- Built a browser-based voice assistant using the Web Speech API with real-time speech-to-text and command parsing.
- Automated web search, application launching, reminders, and weather retrieval through event-driven JavaScript, reducing manual navigation time.

Weather App (HTML5, CSS3, JavaScript) — GitHub

- Built a real-time weather application integrating the OpenWeatherMap API with location-based search and dynamic data display.
- Used the fetch() API for asynchronous data retrieval and handled API responses in a fully responsive interface.

EDUCATION

B.Tech, Computer Science Engineering — Galgotias University *2022 – 2026*
CGPA: 7.38/10

Class XII — Laxmi Narayan Dubey College *2020 – 2022*
Percentage: 76.80%

CERTIFICATIONS & ACHIEVEMENTS

- Java Foundations — Oracle Academy
- AI & Machine Learning — EduSkills
- Solved 165+ problems on LeetCode (Data Structures & Algorithms)
