LinkedIn — GitHub — LeetCode — Portfolio

Profile Summary

Computer Science Engineering undergraduate with hands-on experience in developing full-stack web applications using Java, JavaScript, React.js, Node.js, Express.js, and MongoDB. Skilled in building responsive user interfaces, RESTful APIs, authentication systems, and database-driven applications. Strong understanding of Data Structures and Algorithms, having solved 165+ problems on LeetCode. Seeking Software Developer, or MERN Stack Developer opportunities.

Work Experience

MERN Full Stack Developer Intern — EduSkills Academy *jan 2026 – Mar 2026*

- Completed a 10-week industry internship covering the full MERN stack, from core JavaScript and React fundamentals through advanced Node.js and backend best practices.
- Built React single-page applications using Hooks, Context API, Redux Toolkit for state management, React Router for navigation, and Tailwind CSS for responsive styling.
- Developed RESTful APIs with Node.js and Express.js, integrated MongoDB with Mongoose for data persistence, and implemented JWT-based authentication and authorization.
- Delivered a capstone e-commerce platform with user management and product catalog features, plus a time series analytics project, following Git-based DevOps workflows for version control and deployment.
- **Certificate ID:** 2026-7FCEA34B48 — **Issued Mar 09, 2026**

Projects

Doctor Appointment Booking System (MERN Stack) GitHub — Live

- Developed a full-stack healthcare platform with dedicated Patient, Doctor, and Admin dashboards supporting role-based workflows, using MongoDB, Express.js, React.js, and Node.js.
- Implemented JWT-based authentication and role-based access control (RBAC), doctor search by specialty, appointment scheduling, and real-time status management across three user roles.
- Built and documented 9 RESTful API endpoints and integrated the Razorpay payment gateway, enabling end-to-end appointment booking and secure transaction workflows.
- Optimized for production: achieved Google Lighthouse scores of 75 (Performance), 88 (Accessibility), and 83 (SEO), with zero Cumulative Layout Shift and a 2.7s Speed Index.

AI Virtual Assistant (JavaScript, Web APIs) GitHub

- Built a browser-based, voice-controlled virtual assistant using the Web Speech API with real-time speech-to-text recognition and command parsing.
- Automated common browser tasks – web search, launching applications, setting reminders, and fetching weather updates - via event-driven JavaScript, cutting task completion time versus manual navigation.

Weather App (HTML5, CSS3, JavaScript) GitHub

- Built a real-time weather forecasting application using the OpenWeatherMap API.
- Implemented location-based weather search and dynamic weather information display.
- Used `fetch()` API for asynchronous data retrieval and designed a fully responsive user interface using modern CSS techniques.

Technical Skills

Programming Languages: Java, JavaScript
Frontend Development: HTML5, CSS3, React.js, Tailwind CSS, Bootstrap
Backend Development: Node.js, Express.js, REST APIs
Database: MongoDB, MySQL
Tools & Platforms: Git, GitHub, VS Code, Vercel, Render
Concepts: DBMS, Operating Systems, OOP, Computer Network

Education

- **B.Tech in Computer Science Engineering**, Galgotias University *2022–2026*
  CGPA: 7.38/10
- **Class XII**, Laxmi Narayan Dubey College *2020–2022*
  Percentage: 76.80%

Certifications & Achievements

- **Java Foundations** – Oracle Academy
- **AI & Machine Learning** – EduSkills
